

Impact of the war in Ukraine on our supply capability

Neckarsulm, February 24, 2022

Dear customers,

Currently the consequences of the war in Ukraine are still unforeseeable. Where we can, we would like to create the best possible transparency through this letter.

We have checked the parts in our portfolio with Russian and Ukrainian origin. Also, we have analyzed the sales data of the last few years. The result is that we do not have to expect negative impact from the perspective of our product's origin. At the same time, we are already in communication with our manufacturers to clarify the situation in regards to primary material.

The events of recent months have shown how complex and unforeseeable global supply chains sometimes can interact. That is why, in addition to all due diligence, our focus stays on availability, now and in the long term. Which is why we have increased our stock levels for you. Through forward-looking scheduling, we ensure the sustainable supply of goods in the best possible way.

Due to the sometimes extreme demand we can see these days, we however recommend you to also order on a longer term and to place blanket orders with us, as far as possible.

Best regards,

Börsig GmbH Electronic-Distributor
